Raika peanut

All Raika products are grown in the fertile farms of this company without any chemicals and in a completely organic way, and after sorting, we deliver them raw or processed in various packages to our customers all over the world. All Raika products are sampled and tested in the advanced laboratories of this company to ensure the quality of our products.

Peanut

Peanuts are one of the most nutritious nuts in the world containing many essential nutrients and an excellent source of manganese, niacin, etc. Peanuts are a good source of vitamin E, folic acid, fiber and phosphorus. This product contains many nutrients that are used to reduce the risk of cardiovascular problems, control weight, stabilize blood sugar levels, and increase metabolism in the body. Peanuts are used raw or salted and are also used in products such as oil or to make peanut butter.
